DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 33, drawn to VCR like functions, classified in class 725, subclass 87.
- II. Claims 34 - 55, drawn to control processing, classified in class 725, subclass 93.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as pausing a video-on-demand video stream (i.e. VCR type functions). See MPEP § 806.05(d).
